

FURKAN ÇELİK

DATA SCIENTIST

+90 506 162 23 22 | imfurkaann@gmail.com | github.com/imfurkaann

Objective

Analytical-minded Data Science enthusiast with a strong foundation in Mathematics and hands-on experience in AI development. Proficient in Python, Machine Learning, and LLMs, with a focus on building data-driven solutions. Gained practical industry insights through a professional AI Developer internship, where I contributed to the development and optimization of real-world AI models. Passionate about machine learning and statistical modeling, I am eager to leverage my technical skills and continuous learning mindset to contribute to innovative projects in a dynamic environment.

Experience

Data Scientist Intern @Nevisoft - Turkey

Dec 2022 - June 2023

- **Optimized large-scale simulation datasets** by reducing 50,000+ pressure points to key geometric neighborhoods (30-50 points), significantly enhancing data processing efficiency.
- **Developed and evaluated multiple Machine Learning models**, achieving over **90% accuracy** through rigorous performance metric analysis.
- **Engineered Time-Series Classification modules** for an internal AutoML project, leveraging **Scikit-learn**.
- Utilized **Pandas, Matplotlib, and NumPy** for comprehensive exploratory data analysis (EDA) and visualization.

AI Developer @CranioCatch - Turkey

June 2023 - Dec 2023

- **Architected a document analysis system** using the **LangChain** framework to automate information extraction and synthesis.
- **Implemented LLMs**, including **LLaMA, OpenAI (GPT), and HuggingFace** open-source models, for specialized NLP tasks.
- **Deployed Generative AI workflows** using **Stable Diffusion** models to automate high-quality video production.
- Collaborated on integrating advanced AI models into production-ready pipelines, focusing on model scalability.

Education

Eskişehir Osmangazi University (Math and Computer Science)

February 2026

Skills

Programming Languages:

- Proficient: **Python, SQL, MongoDB**
- Familiar: **C#, PHP**

Cloud Platforms & DevOps:

- Platforms: **Git, Google Cloud Platform (GCP) (Entry), AWS(Entry), Docker(Entry)**
-

AI & Machine Learning:

- Frameworks: **Pandas, Numpy, Matplotlib, Seaborn, scikit-learn, TensorFlow, LangChain**
- Applications: **Predictive Analytics, AutoML, Generative AI, ChatBot, ML Models**

Other Skills:

- Strong problem-solving and debugging abilities
- Excellent communication and collaboration in cross-functional teams
- Persistent and detail-oriented problem solver.
- Prone to learning new things
- English B1
